

Table of Contents

Executive Summary	iii
List of Figures	xii
List of Tables	xiii
List of Appendices	xv
List of Acronyms and Abbreviations	xvi
Chapter 1 -- Introduction	1
Background	1
Process and Bases for Establishment of Minimum Flows and Levels.....	3
Process Steps and Activities.....	3
Legal and Policy Bases for Establishment of Minimum Flows and Levels.....	4
Identify Relevant Water Resource Functions	4
Identify Considerations and Exclusions: Baseline Conditions to Protect Water Resource Functions.....	5
Level of Protection for Water Resource Functions Provided by the MFL Standard of <i>Significant Harm</i>	5
Other Levels of Harm Considered in Florida Statutes.....	6
Consumptive Use Permitting Role - Harm Standard.....	6
Water Shortage Role - Serious Harm Standard.....	7
MFL Recovery and Prevention Strategy	8
Document Structure	9
Chapter 2 -- Description of the Water Body	9
Introduction.....	9
Description of the Watershed	10
Rainfall, Climate and Weather Patterns.....	10
Pre-Development Hydrology.....	12
Major Drainage Sub-Basins	13
Watershed Components	15
Northwest Fork of the Loxahatchee River and Upstream Watershed.....	15
Physical Features	15
Floodplain Plant Communities	16
Wild and Scenic River Designation.....	16
Tributary Inflows.....	16
Downstream Areas	17
Central Embayment	19
North Fork	19
Northwest Fork Estuary.....	20
Southwest Fork.....	20
The Loxahatchee Estuary.....	22
Inlet Configuration/Coastal Influences.....	22
Drainage Alterations.....	22
Shorelines.....	22
Sediments	23
Salinity	23
Biological Resources.....	24
Mangroves	24
Submerged Aquatic Vegetation	25
Oysters.....	26
Benthic Macrofauna	27
Fishes.....	29
Manatees.....	30
Adjacent Coastal Waters	31
Watershed Features and Alterations.....	31
Surface Water Hydrology.....	34

Table of Contents (Cont.)

Surface Water and Ground Water Relationships	36
Major Aquifer Systems	36
Relationship between Groundwater and Surface Water Resources	37
Soils.....	38
Land Use	39
Water Supply.....	41
How Water is Allocated and Used:.....	41
Overview of Consumptive Uses within the Watershed:	43
Water Quality	45
Natural Systems.....	47
Major Plant Communities.....	47
Wetlands.....	49
Uplands.....	50
Estuary.....	50
Plants and Animals	51
Navigation and Recreation	54
Water Resource Issues -- Problems Identified	55
Surface Water Resources.....	56
Groundwater Resources.....	56
Habitat Management	57
Loxahatchee River Watershed Problem Matrix.....	58
 Chapter 3 -- Resource Functions and Considerations	 59
Water Resource Functions	59
Fish and Wildlife Habitat	60
Preservation of the River's Wild and Scenic Values	61
Drainage and Flood Protection.....	61
Water Supply.....	63
Recreation	67
Navigation	67
Historical and Archeological Values	68
Water Quality Improvement.....	68
Resource Protection Issues and Concerns	69
Considerations and Exclusions.....	70
Considerations.....	70
Natural Systems	71
Hydrology.....	71
Water Supply.....	72
Flood Protection	72
Water Quality	72
Navigation and Recreation	73
Exclusions	73
 Chapter 4 -- Methods for Developing Minimum Flow Criteria	 75
Methods Considered to Develop MFL Criteria.....	75
Methods Used	77
Establishing Geographic Locations along the River.....	77
Hydrologic and Hydrodynamic Methods	79
Review of Historical and Current Conditions.....	79
Development of a Hydrodynamic/Salinity Model	79
Model Description	79
Modeling Assumptions	80
Calibration and Verification.....	80
Simulation of a 30-Year Salinity Record for the NW Fork.....	81

Table of Contents (Cont.)

Documentation of Historic Water Use within the Loxahatchee Basin.....82

Simulation of Consumptive Uses within the Loxahatchee Basin82

Biological Methods83

 Literature Review83

 Aerial Photography/GIS Studies.....84

 River Vegetation Surveys85

 Semi-Quantitative Vegetation Survey (November 2000/December 2001)85

 Quantitative Vegetation Survey (January 2002)86

 Soil Salinity Survey87

 Estimate of Historic (Pre-Development) Flow Conditions for the Watershed88

 Statistical Analyses of Relationships between River Flow and Salinity88

 Development of a River Vegetation/Salinity (SAVELOX) Model.....88

Chapter 5 -- Proposed Minimum Flow Criteria (Results)92

 Introduction.....92

 Results of Literature Review95

 Hydrologic and Salinity Conditions99

 Sources of Freshwater Inflow.....99

 Northwest Fork.....99

 North Fork102

 Southwest Fork.....102

 Salinity Conditions within the Northwest Fork102

 Historical Data.....102

 Soil Salinity Survey Results104

 Effects of Consumptive Uses106

 Effects of Water Uses on Flows in the Loxahatchee River:106

 Biological Results109

 Importance of the Freshwater Floodplain Swamp109

 The Effects of Salinity on Cypress Trees110

 Concepts to be Considered110

 Literature Review112

 Conclusions and Recommendations112

 River Vegetation Survey Results.....113

 Semi-quantitative Survey.....113

 Quantitative Survey116

 Vegetation Community Measurements.....117

 Number of Adults117

 Tree Height and Trunk Diameter117

 Number of Saplings and Seedlings Present.....117

 Canopy Cover118

 Historical Changes in River Vegetation Communities119

 Aerial Photography Survey Results.....119

 1940 Vegetative Cover121

 1985 and 1995 Vegetation Communities123

 Six Decade Analysis126

 1953 to 1979 Vegetation Coverages127

 Factors that Influenced Changes in Vegetation127

 Comparison to Previous Studies130

 Summary.....131

 Vegetation Changes along the Northwest Fork Since 1985132

 Other Factors Considered.....134

 Proposed VEC for the Northwest Fork135

 Rationale for VEC Selection135

Table of Contents (Cont.)

Species Selected	136
Summary	137
Application of Modeling Tools	138
Analysis of the Simulated Long-term Salinity Record	138
Exposure to Different Salinity Concentrations at Particular Locations	138
Statistical Properties of Predicted Salinity Concentration Data	138
Distribution of Salinity Concentrations.....	140
Duration and Frequency of Exposure.....	140
Effects of Flow from Lainhart Dam on Salinity Conditions in the River	141
Chapter Summary	142
Application of the River Vegetation/Salinity (SAVELOX) Model	143
SAVELOX Model Results	144
Development of Resource Protection Criteria	145
Definitions of No Harm, Stressed and Significant Harm.....	148
No Harm.....	148
Stressed.....	149
Significant Harm.....	149
Proposed Minimum Flow Criteria	150
Basis of Proposed Criteria	150
Protection from Harm	150
Protection from Significant Harm	150
Technical Criteria	151
Chapter 6 -- MFL Recovery and Prevention Plan and Research Needs	151
Introduction and Overview.....	151
MFL Recovery and Prevention Strategy	151
Implementation Policies	152
Implementation Process	152
Management Targets.....	153
Phased Recovery Plan	154
Operational Protocols	155
Regulatory Components	155
Phased Recovery Plan	155
Phase 1 (2002).....	155
Phase 2 - Five Years (2002 through 2006)	157
Phase 3 - Five Years (2011-2014)	157
Phase 4 - CERP (2002 through 2021)	157
Summary of Project Costs and Benefits	157
Water Delivery Benefits of Proposed Projects	158
Evaluate Options to Obtain Water from other Basins	159
Pal-Mar/Cypress Creek and Hobe Groves.....	159
Kitching Creek	160
1. Kitching Creek Water Quality Improvement.....	160
2. Kitching Creek East Tributary Diversion Berm.....	160
3. Flora Avenue Area Improvements	160
Operational Protocols.....	161
Interim Operating Procedures.....	161
Development of New Operational Protocols	161
Design and Operational Issues that Suggested for Consideration by Concerned Citizens and Other Agencies ...	161
Process or Activity to Address this Issue	162
Regulatory Components of the MFL Recovery and Prevention Strategy.....	162
Consumptive Use Provisions/MFL	163
Water Shortage Plan Implementation	163

Table of Contents (Cont.)

Restoration Components for the Northwest Fork164
Water Reservations.....165
 Legal Description165
 Development and Implementation165
Adaptive Management of the Loxahatchee River and Estuary.....165
 Research Needs165
 Monitoring Program167
 Adaptive Management Operational Strategy.....168
 Components.....168
 Benefits.....168

Literature Cited.....169

Glossary177
